Grease
Car Hire

The car has been constructed so that it can be stood on and danced on. The car is Left Hand drive and can be the old rusty car and when the interchangeable parts have been used it becomes the pristine Grease car.

The car has been designed to be viewed from the left hand side and from straight on. The car measures 146cm wide and 273cm long and sits on 6 castors for easy movement. The four car wheels do not touch the ground.

When the car is in the old rusty condition it has no bumper and no rear wheel arch. The windscreen is large and rusty and the drivers door is rusty. The wheels have no hub caps. Additional rusty patches can also be used. Whilst the cast are singing the 'Grease Lightening' they can also add the new chromed front bumper, the new rear wheel arch, swap over the driver's door, change the windscreen for the smaller perspex screen and add the hub caps. There are also chrome light surrounds for the head lights that can be added.

To climb onto the car there is a cut out in the front right hand wheel arch so that you can use the wheel as a step up onto the bonnet. The rear of the car is also constructed as a step and the area behind the seat can be stood on. There is a running board which can also be stood on. The front and rear break must be used at all times if the car is to be stood on.

The front and rear break can be seen in the front of this picture

The step at the back of the car can be seen in this picture

The cost of hiring the car

£250 hire charge.

£200 deposit
